

www.transport.nottinghamcity.gov.uk July 2014

Welcome to the July edition of the roadwork's and major transport schemes update.

This update is provided to give an overview of roadwork's taking place across Nottingham during July, focusing on the major projects of the Ring Road, the NET Phase Two tram extension and the A453 widening.

Nottingham City Council is working closely with partners to co-ordinate these major transport projects to build a better Nottingham. Whilst the current work taking place is a strain on the existing road network, all projects are being closely co-ordinated between partners and we will do all we can to keep disruption to a minimum.

We are sorry for the inconvenience caused by the works but we are confident that transport delays in the short term will result in longer term gains for the local economy and the city as a whole.

Please note, information contained in this update is correct at the time of publication. For further information or for specific enquiries please use the contact details provided for each project.
