Nottingham Ring Road

Improvement Scheme

Advance works at Aspley Lane

Nottingham Ring Road (A6514) Improvement Scheme, which seeks to reduce congestion and delays across the city, is due to start in July 2013. However, before construction can start on the Aspley Lane section, some initial advance works will start on 6 July 2013 for two weeks. These include:

- installing temporary traffic signals and traffic management equipment;
- groundworks at Aspley Lane island;
- and the removal of some trees in the central reservation.

Nottingham's Ring Road is an important and attractive green corridor within the city. The City Council is keen to preserve this character. The road improvement scheme has been carefully designed in consultation with tree specialists, with the intention of removing as few mature trees as possible. However, some localised tree removal is required around the existing Aspley Lane junction to make way for the new road layout. Semi-mature trees will be planted to replace those removed.

The advance works will be carried out by Nottingham City Council's Highway Services, between the hours of 8am and 6pm. There will also be minimal evening works from 8 - 12 July 2013, 7.30pm - 10.30pm. Some delays are possible, but severe disruption is very unlikely during these advance works. Please plan journeys where possible.

For further information, please call the Ring Road team on 0115 876 5287.
