February 2015

# A453 Widening Community News

Welcome to the 7th edition of our monthly newsletter

## Meet the Team

Our open surgeries are an opportunity for you to meet a few of our team members, see the project plans and ask any questions you may have.
Your next 'Meet the Team' day is:

**Wed 11th Feb**

**10am-12pm**: Clifton Green Village Hall
**1pm -3pm**: Clifton Cornerstone
**5pm -7pm**: Clifton Green Village Hall

# February on the A453 urban section

*Here's a summary of what's happening and where in the next month*

### Green Lane Junction

During the start of the month, the A453 access/ egress of Glapton Lane will be closed as we undertake construction of your new westbound carriageway. We anticipate re-opening Glapton Lane by 13th February.

This month, we will be undertaking a full depth road construction on the North side of the junction. There will be a **full closure** at the A453 junction end of Green Lane on the nights of **10th, 11th and 12th** February. Then, **from Friday 13th February the Green Lane access/ egress will be left turn in only from the A453.** (Both left right and right turns out of the junction will still be possible.) Vehicles wishing to turn right into Green lane should continue down the A453, turn around at Farnborough junction and come back up the westbound carriageway.

### Crusader Roundabout

At the start of the month, we will be commissioning the traffic lights at 10am on Tuesday 4th February, weather permitting.

### Farnborough Road Junction

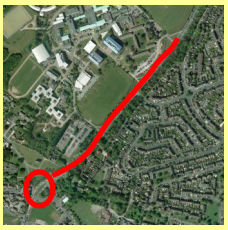

Works at Farnborough are on programme and ongoing. The next traffic switch will be will be 27th February, which will then result in a full roundabout alignment

### Nottingham Trent Uni

We will be carrying out surfacing works between NTU North Entrance and Farnborough Junction in mid-February.

Access/ Egress to Sunninghill Drive will continue to be closed until mid-March to allow us to carry out tie-in construction works.

Final surfacing is planned for the last week of March.

**For weekly updates:** see our 'journey impact page' for the A453 Widening Scheme on the Highways Agency's website at highways.gov.uk

## Environment win!

Every month, we've diverted between **95-99%** of our waste away from landfill sites, which means others can re-use/ recycle our materials and we're keeping the planet cleaner.

**Need to get in touch with us?** Your contacts at Laing O'Rourke are Luke Mitchell and Claire Brough. You can email Luke at LMitchell@laingorourke.com or Claire on CBrough@laingorourke.com

(Information regarding bus stop and pedestrian crossing location changes is available on request).
