

Improved side-road crossings for pedestrians and cyclists on Western Boulevard

The City Council are continuing a programme of works to change side roads along Nottingham's Ring Road to make crossings for cyclists and pedestrians safer and more convenient. This is part of the £16.2m investment in the Ring Road Improvement Scheme.

Different types of junction layouts will be built where the existing off-road cycle route crosses the road. One of these will set Give Way markings back from the junction, so that vehicles entering and leaving give way to cyclists and pedestrians crossing the junction. On quieter roads and cul-de-sacs, the junction will be changed to a layout which is similar to that of a private drive, where the motorist gives way to pedestrians and cyclists on the shared path.

From **Wednesday 9th March 2016** we are building the give way side-road layout on Franklyn Gardens ensuring vehicle access is able to be maintained at all times during construction.

To help us to complete these improvements quickly and safely, off-peak lane restrictions will be in place on the Ring Road (northbound only) to provide a temporary path for pedestrians and cyclists around the works site. Access for motorists to and from Franklyn Gardens will be managed manually on a give-and-take arrangement. The works will be completed by **Tuesday 22nd March 2016.**

We apologise in advance for any inconvenience that these works may cause and would like to assure you that we will do all that we can to keep disruption to a minimum.

For more information about these works, please contact us on **(0115) 924 2454**, email ringroad@nottinghamcity.gov.uk or visit the website **www.nottinghamcity.gov.uk/ringroad**
