

Nottingham Ring Road Improvement Scheme update October 2015

New and improved crossing facilities for pedestrians and cyclists to be installed on Western Boulevard

From Monday 12th October 2015, we will be starting works on Western Boulevard to improve the existing signalised junction with Wilkinson Street and upgrade the crossing facilities close to Newport Drive. These works are part the £16.2m investment in improving Nottingham's Ring Road.

The traffic signals at the junction of Western Boulevard and Wilkinson Street will be upgraded and a new pedestrian and cycling crossing facility introduced over the Ring Road. There will be minor changes to the pavement layout on Wilkinson Street to make it easier for pedestrians and cyclists to cross.

The crossing facility close to Newport Drive will also be upgraded to allow pedestrians and cyclists to cross the Ring Road at the same time.

The works will generally take place during off-peak times and during the works lane restrictions will be in place on Western Boulevard. It will be necessary to operate the junction on temporary two-way traffic signals so some delays may be experienced. The works have been planned to take place at off-peak times when traffic levels are lower and we will work hard to keep any disruption to a minimum. Works are expected to be completed by Sunday 22nd November.

We apologise in advance for any inconvenience that these works may cause you, and would like to assure you that we will do all that we can to keep disruption to a minimum.

For more information about these works, please contact us on **(0115) 924 2454**, email ringroad@nottinghamcity.gov.uk or visit the website **www.nottinghamcity.gov.uk/ringroad**
