Nottingham CYCLE CITY NEWS

March 2016

Castle Boulevard works update

The City Council's cycle route construction programme, funded by the Council and a £6.1m investment by the D2N2 local Enterprise Partnership, is proceeding well.

The next phase of work is set to start on Tuesday 29th March 2016 and is due to be completed by 6th May. These works are detailed below and on the plan overleaf.

Palatine Street to Haslam Street

From 29th March until approximately 6th May all parking will be suspended on both sides of Castle Boulevard from Palatine Street to Haslam Street. This is to provide a safe working area to build the 'Western' cycle superhighway and to minimise traffic disruption. Alternative parking locations are shown on the plan overleaf.

After completion of the works in this area the parking on the north side of Castle Boulevard between Palatine Street and Haslam Street will be reinstated as dual use resident and Pay & Display parking bays. The south side will be the cycle superhighway.

Bus stops within this area will be temporarily relocated during the construction works and the stop on the south side will move to a new location slightly west (LE13) of its current position (see plan). No bus services will be disrupted.

The pedestrian crossing at Fishpond Drive will be renewed. Whilst we carry out this work it will have to be closed but an alternative crossing facility will be provided near Ocean Designs/Zoo Interiors and will be clearly signed (see plan).

There will be a new footway and road layout built at each of the side roads within the 'Western' cycle superhighway on Castle Boulevard. We will contact affected citizens prior to the start of this work as we will need to suspend some parking on the side roads while we carry out these works. Access will always be maintained.

The next phase of these works will be from Haslam Street to Castle Road and is planned to start at the beginning of May. We will be updating citizens nearer the time about these works.

The artist impression on the plan overleaf shows how the side road entry treatment will look on the 'Western' cycle superhighway when completed.

Please note that we are expecting disruption at times along the route.
