Nottingham CYCLE CITY NEWS

Western Cycle Corridor update – May

The City Council's Cycle City Ambition route construction programme, funded by the City Council and a £6.1m investment by the D2N2 local Enterprise Partnership, is proceeding well.

Abbey Bridge roundabout works will continue with the addition of two new phases of work, which are set to begin on Monday 16th May 2016.

Abbey Bridge roundabout

The work to build the cycle superhighway continues. The new pedestrian crossing at Abbey Bridge has now been installed and will be in full use at the start of June.

We will be resurfacing the carriageway at the roundabout on 30th May for 5 nights (19.00 – 23.00). We will send out a separate leaflet on this that provides you with greater detail on how this may affect you.

Castle Bridge Road to Abbey Bridge roundabout

From 16th May until the end of July 2016 work to build the cycle superhighway will take place here. See attached plan.

Grove Road will be permanently closed to all vehicles from approximately 23rd June 2016. To access Grove Road you will need to use Alderney Street, Broadholme Street or Hungerton Street. These changes are being made so that we can improve cycling and pedestrian links. One improvement will be the relocation of a crossing provided closer to Grove Road improving links to the roundabout and Willoughby Street for both pedestrians and cyclists.

The existing crossing will be taken out of use on 16th May and the new crossing will be available to use in late July. During this time please use the crossing at Castle Bridge Road and the newly developed crossing at Abbey Bridge at the start of June.

Bus Stop LE15 will be moved to a new location. The existing bus stop will continue to be used until the new bus stop is ready for use. Bus Services will not be affected.

There will be a new footway and road layout built at each of the side roads within the 'Western' cycle superhighway on Castle Boulevard. We will contact affected citizens prior to the start of this work. Access will always be maintained.

Abbey Bridge roundabout to Hoyland Avenue

From 16th May until June 2016 work to build the cycle superhighway will also take place here. These works will have minimal impact on citizens. See attached plan.

The next phases of works on the Western Cycle Corridor will be from Abbey Road/Hoyland Avenue to Dunkirk roundabout. We will be updating citizens nearer the time about these works.

Please note that we are expecting disruption at times along the route.
