

Improved side-road crossings for pedestrians and cyclists on Middleton Boulevard

The City Council are proceeding with works to make changes to side roads, making crossings for cyclists and pedestrians safer and more convenient on Middleton Boulevard.

Different types of junction layouts will be built where the existing off-road cycle route crosses the road. One of these will set 'Give Way' markings back from the junction, so that vehicles entering and leaving give way to cyclists and pedestrians crossing the road. On quieter roads and cul-de sacs, the junction will be changed to a layout which is similar to that of a private drive, where the motorist gives way to pedestrians and cyclists on the pavement.

From **Wednesday 29th June 2016**, construction will start to build the Give Way side-road layout on Fairham Drive at its junction with Middleton Boulevard.

To help complete these improvements quickly and safely, Fairham Drive will be closed to all traffic at its junction with Middleton Boulevard. Lane restrictions will be in place between 9.30am and 3.30pm on the ring road to provide a temporary path for pedestrians and cyclists around the works site. A signed diversion route will direct motorists to use Dorket Drive and Orston Drive for the duration of the works that will be completed by Tuesday 12th July 2016.

We apologise for any inconvenience that these works may cause you, and would like to assure you that we will do all that we can to keep disruption to a minimum.

For more information about these works, please contact us on (0115) 876 5287, email traffic.management@nottinghamcity.gov.uk or visit the website **transport.nottinghamcity.gov.uk**
