Nottingham CYCLE CITY NEWS

October 2015

Castle Boulevard/Castle Bridge Road cycle super highway works set to start

Construction of the Western Cycle Corridor in the Castle Boulevard/Castle Bridge Road area will start on November 2nd 2015 and continue until January 31st 2016.

This is continuing the building of the first section of the 'cycle super highway' – offering cyclists a rapid and safe cycle route.

They are part of the City Council's Nottingham Cycle City programme, with £6.1m funding being provided by the D2N2 Local Enterprise Partnership.

The works will affect pedestrians, cyclists and other road users on parts of Castle Boulevard and Castle Bridge Road (see map overleaf).

Some temporary traffic management changes will be introduced and these will affect the road crossings and traffic lights in the local area. It is likely that pedestrians will have to walk further to access road crossings.

Nottingham City Council apologises for any inconvenience that may be caused as we build the new Western Cycle Corridor.

Works schedule

Castle Bridge Road junction - November 2nd to 31st January 2016:

- The cycle lane on the north side of Castle Boulevard will be removed.
- The pedestrian crossings along Castle Boulevard, to the left and right of the Castle Bridge Road junction will be removed for this period.
- A new temporary uncontrolled crossing will be installed on Castle Bridge Road.
- Pedestrians will need to use the crossings at Grove Road or Fishpond Drive instead.
- Temporary traffic lights will be installed at the Castle Bridge Road junction.

Traffic flows will always be maintained throughout the work period but the traffic management will vary at times. If possible, please use an alternative route:

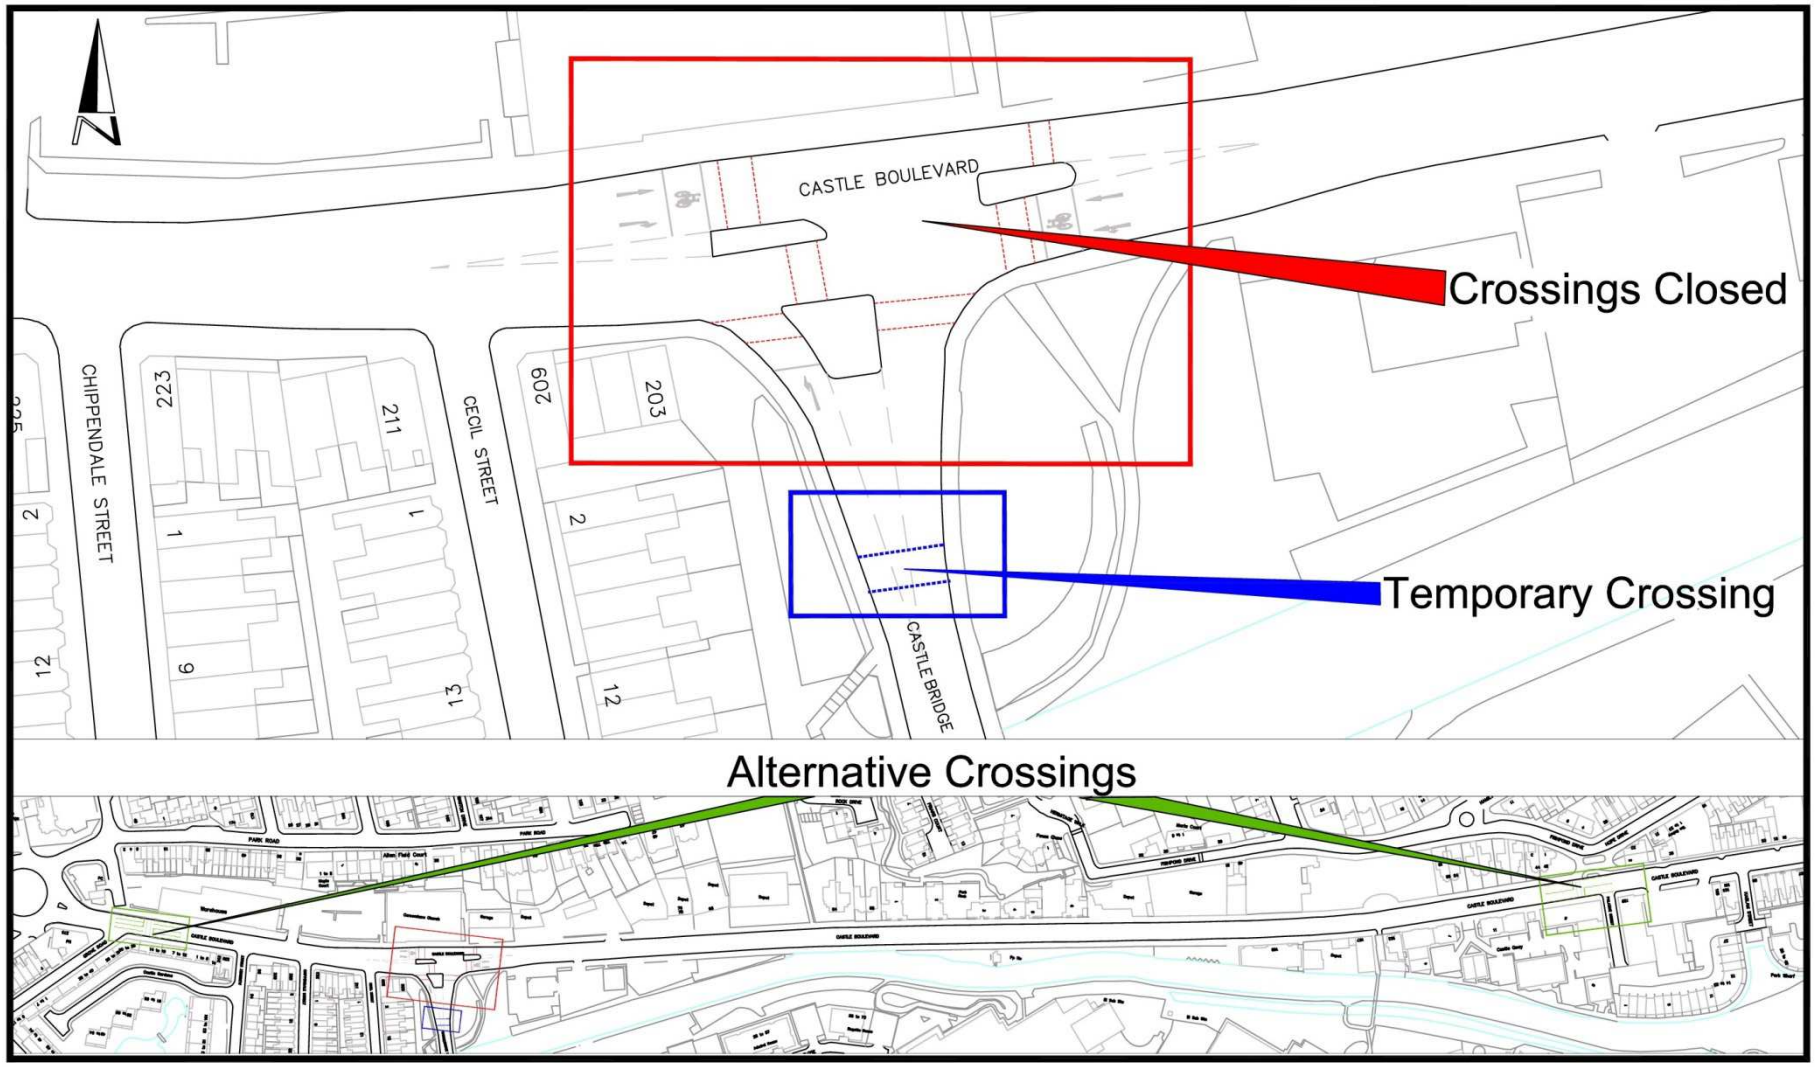

- **Into the City** please use Derby Road
- **Castle Marina area from north or south** please use Queens Drive and join Castle Bridge Road.
