Nottingham CYCLE CITY NEWS

December 2015

Castle Boulevard works update

The City Council's cycle route construction programme, funded by the Council and a £6.1m investment by the D2N2 local Enterprise Partnership, is proceeding well.

The next phases of work are set to start on Sunday 3 January, 2016. These works are detailed below and on the plan overleaf.

- **Castle Road to Palatine Street**

There will be two way lights for around one week on Castle Boulevard, near Peveril Drive, from 4 January to remove the central refuge. The construction of the cycle superhighway works will start here in spring 2016.

- **Palatine Street to Castle Bridge Road**

From 4 January, all pay and display parking will be suspended on Castle Boulevard from Castle Bridge Road to Haslam Street.

This is to provide a safe working area to build the cycle superhighway and to minimise traffic disruption. As the superhighway is constructed (from Castle Bridge Road towards Castle Road) and more space becomes available, parking on the north side will be reinstated.

- **Castle Bridge Road junction**

Work is well underway here and will be completed by 31 January – no further disruption to traffic is anticipated.

- **Castle Bridge Road to Grove Road**

Works to commence in spring 2016.

- **Abbey Bridge roundabout**

Abbey Bridge will be closed between the roundabout and its junction with Gregory Street (with access maintained for residents' and businesses) on 3 and 10 January to remove a tree which unfortunately sits exactly in the space that the new cycle route will be built. We will, however, as part of the Western Cycle Corridor works, plant new replacement trees. A number of these will be planted along Castle Boulevard to provide a greener, pleasant street view.

During week commencing 4 January, new traffic management measures will be installed around the Abbey Bridge roundabout to allow construction of the new junction layout. This will reduce the number of lanes around the roundabout to one, similar to the layout of the roundabout in the final scheme. To facilitate these works from 11 January, Harley Street will be closed at its junction with the roundabout for approximately 7 weeks. The diversion route will be via Osmaston Street and Chilwell Street.

- **Sherwin Road**

Works are well underway here and will be completed by 15 January.

As we progress with the cycle superhighway we will contact you well in advance if we need to work through your access.

Please note that we are expecting heavy disruption at times and apologise for the inconvenience caused.
