

Brand new pavements being laid and better side-road crossings for pedestrians and cyclists on Middleton Boulevard

We will be laying brand new pavements on the 'northbound' section of Middleton Boulevard, between the Derby Road (A52) roundabout and Crown Island from **Monday 25th July 2016**.

As well as laying the pavements with tarmac which includes tidying grass verges, we will make changes to all side roads to make it easier for pedestrians and cyclists to cross.

Different types of junction layouts will be built where the existing off-road cycle route crosses the road. One of these will set 'Give Way' markings back from the junction so that vehicles entering and leaving give way to cyclists and pedestrians crossing the road. This type of layout will be built on all side roads on this section of Middleton Boulevard starting with Sutton Passeys (south) on the same date as the above stated and will take one week to complete.

The work to lay the new pavements on this section of Middleton Boulevard is expected to take 6 weeks. Lane restrictions will be in place between 9.30am and 3.30pm on the ring road to provide a temporary path for cyclists and pedestrians around the works site. The section between Derby Road and Sutton Passeys (south) has recently been completed therefore works will recommence from Sutton Passeys towards Crown Island.

Pedestrian access to homes which front onto Middleton Boulevard will be maintained throughout, and vehicle access to driveways should remain unaffected, but if, for any reason, we do need to temporarily close the access to any driveways to be able to undertake these improvements, we will let residents know in advance.

We apologise for any inconvenience that these works may cause you, and would like to assure you that we will do all that we can to keep disruption to a minimum.

For more information about these works, please contact us on (0115) 876 5287, email traffic management@nottinghamcity.gov.uk or visit the website **transport.nottinghamcity.gov.uk**
