Nottingham CYCLE CITY NEWS

Western Cycle Corridor update – June

The City Council's Cycle City Ambition route construction programme, funded by the City Council and a £6.1m investment by the D2N2 local Enterprise Partnership, is proceeding well.

Abbey Bridge roundabout is now completed and Castle Boulevard works will continue with the addition of a new phase of work, which is set to begin on Monday 6th June 2016.

Abbey Bridge roundabout

The construction work to build the cycle superhighway here is now complete. We will be returning to site soon to restore the landscaping in the area.

Castle Bridge Road to Abbey Bridge roundabout

Work continues here until the end of July 2016.

Abbey Bridge roundabout to Hoyland Avenue

Work continues here until mid-June 2016.

Abbey Bridge – Hoyland Avenue to west of Coleby Avenue

From 6th June until the end of July 2016 work to build the cycle superhighway will take place here (see attached plan).

There will be a new type of crossing constructed called a parallel crossing (see image overleaf). This is a new type of zebra crossing that has a dedicated area for cyclists to cross adjacent to pedestrians.

As this is new to Nottingham we will put up temporary signs to warn drivers of this layout.

Whilst we construct the new parallel crossing at the beginning of July we may need to use two way lights (off peak) for approximately two weeks.

Bus Stop LE16 and LE19 will be moved to new locations. Temporary bus stops will be provided in the nearby vicinity whilst the works take place. Bus Services will not be affected.

There will be a new footway and road layout built at Hoyland and Coleby Avenue. Some resident's parking may need to be suspended while we do this work. We will contact affected citizens prior to the start of this work. Access will always be maintained.

The next phase of work on the Western Cycle Corridor will be on Abbey Street from south of the Gregory Street junction to Warwick Street. We will be updating citizens nearer the time about these works.

Please note that we are expecting disruption at times along the route.
