Roadworks News

Western Cycle Corridor roadworks on Castle Boulevard and Peveril Drive October 2015

Work is set to start on the Western Cycle Corridor, these are preparatory works for building the first section of the 'cycle super highway' – offering cyclists a route designed to the highest specification.

These works are part of the City Council's £6.1m Cycle City route developments, funded by the D2N2 Local Enterprise Partnership. When complete they will create an east to west cycle route, providing rapid access to and through the city centre.

The works will involve some temporary traffic management changes and changes to the road and pavement layout. We apologise for any inconvenience this may cause.

Castle Boulevard and Peveril Drive, 19th October to 9th November, 2015

Works will include removing the cycle lane on the north side of Castle Boulevard for its entire length.

Peveril Drive 19th October to 2nd November, 2015

We will construct a temporary parking bay in the footpath area on the western side of the triangular island on Peveril Drive.

This will mean that we will suspend the Pay & Display parking on Peveril Drive on the east side for the duration of these works.

Castle Boulevard 2nd November to 9th November, 2015

The central refuges along Castle Boulevard will be removed as will the three buildouts in the works area.

To do this we will have to suspend the residents parking on Castle Boulevard between 8am to 5pm on the north side between Peveril Drive and number 20 Castle Boulevard and the Pay & Display parking on the south side between Haslam Street and Castle Court at some locations during these works.

Alternative parking will be available in the new temporary bays on Peveril Drive during these times. Two-way traffic flows will always be maintained.
