Nottingham City Council Procurement Plan
Last updated 2014-08-20

The council is committed to maintaining transparency and openness by making our five year procurement plan available to the public. This dataset will be refreshed on a regular basis.

The data will be published in CSV (comma-separated values), JSON (JavaScript Object Notation) and PDF formats; the report will be available to download from the Open Data Nottingham website.

Please be aware that the data contained in the Procurement Plan is indicative and may change without notice. Occasionally it may be deemed necessary to withdraw or change Procurements due to the changes in funding for particular works or services.

To assist with understanding this report, the following table explains the headings in the report.

Column Heading	**Explanation**
Contract Title	The main title of the works, goods and/or services to be procured
Procurement Category	The main Category which this Contract comes under, within the Authority
Sub Category	Where necessary the Category may be split down further, to a particular Department or Service Area
Estimated Procurement Start Date (Financial Year and Quarter)	Financial Year and Quarter of when the procurement process will start *Please note that the dates under this column are indicative and so may be subject to change*
Estimated Contract Start Date	Planned date of when the contract for the project, service or supply commences *Please note that the dates under this column are indicative and so may be subject to change*
Estimated Contract Duration in Months	The estimated Contract length in months
Estimated Annual Contract Value (£)	Estimated annual value of the contract *Please note that Contract Value (£) is indicative and so may be subject to change*
Estimated Total Contract Value (£)	Estimated total value of the contract *Please note that Contract Value (£) is indicative and so may be subject to change*
BODY	A unique identifier for the owner of

	the resource
BODY_NAME	A human readable form of the unique identifier of the resource
CREATE_DAT	This field is the date that the row in the table was created and is the same date that the data table was created. It does not refer to the currency of the data, or any other date associated with the content of the data.
