Census 2011: Key and Quick Statistics

Metadata

Overview of the Census

The latest census was undertaken 27 March 2011. The first census in England and Wales was carried out in 1801 and has taken place every ten years (with the exception of 1941, during the second world war.) The census is not only a population count, but provides a wealth of information about our characteristics: how we live, who we are and how we work.

The census results help government and local authorities to plan and run public services and identify the resources people need. Key areas include : housing; health care; transport and education. The census is used by central government for funding allocation. Please note that Nottinghamshire includes all the districts but excludes Nottingham City. The Office for the National Statistics plans and carries out the Census. Please include the following Copyright@ons.gov.uk when referencing the Census 2011 data.

Please note this profile contains only Census data, other data is available on Nottingham Insight from the profile library or the data library.

Country of birth

Country of birth is the country in which a person was born. The country of birth question included six tick box responses - one for each of the four parts of the UK, one for the Republic of Ireland, and one for 'Elsewhere'. Where a person ticked 'Elsewhere', they were asked to write in the current name of the country in which they were born. Responses are assigned codes based on the National Statistics Country Classification. Data is shown as a percentage of the population. (Numbers are shown in brackets).

Passports held

Results for 'Passports held' classify a person according the passport or passports that they held at the time of the 2011 Census. People were asked to indicate whether they held no passport, a United Kingdom passport, an Irish passport, or a passport from another country, and write in the name of the other country if applicable. If more than one of the options were applicable people were asked to indicate all that applied.

In results that classify people by passports held, those who hold a United Kingdom or Irish passport, and any other type of passport, will appear in each applicable category.

The categories 'EU countries' and 'non-EU countries' relate to the European Union (EU) as at March 2011. Data is shown as a percentage of the whole population, but, as people can hold more than one passport, the totals may exceed 100% (Numbers are shown in brackets).

All dwellings/all household spaces

A household space is the accommodation used or available for use by an individual household. Household spaces are identified separately in census results as those with at least one usual resident, and those that do not have any usual residents. A household space with no usual residents may still be used by short-term residents, visitors who were present on census night, or a combination of short-term residents and visitors. Vacant household spaces and household spaces that are used as second addresses are also classified in census results as household spaces with no usual residents.

A household is defined as one person living alone, or a group of people (not necessarily related) living at the same address who share cooking facilities and share a living room or sitting room or dining area. A household must contain at least one person whose place of usual residence is at the address. A group of short-term residents living together is not classified as a household, and neither is a group of people at an address where only visitors are staying.

All data shown as a percentage of households or household spaces. (Numbers are shown in brackets).

Household composition

Household composition refers to the usual residents in a household and their relationship to each other.

Households may be a family or they may consist of one person living alone or unrelated adults sharing. A family is a couple (married, civil partners or cohabiting), with or without children, or a lone parent with at least one child. Children may be dependent or non-dependent. A dependent child is any person aged 0-15 in a household or any person aged 16-18 in full time education and living in a family with their parent(s) Data shown as a percentage of all households. (Numbers are shown in brackets).

Occupancy rating

.

Occupancy rating provides a measure of whether a household's accommodation is overcrowded or under occupied. There are two measures of occupancy rating, one based on the number of rooms in a household's accommodation, and one based on the number of bedrooms. The ages of the household members and their relationships to each other are used to derive the number of rooms/bedrooms they require, based on a standard formula. The number of rooms/bedrooms required is subtracted from the number of rooms/bedrooms in the household's accommodation to obtain the occupancy rating. An occupancy rating of -1 implies that a household has one fewer room/bedroom than required, whereas +1 implies that they have one more room/bedroom than the standard requirement. (Numbers are shown in brackets).

Table: Census 2011 Occupancy rating					
	Radford and Park	Nottingham	Nottinghamshire	East Midlands	England
Occupancy rating (rooms) of -1 or less	23.7 (1,814)	12.6	3.8	5.5	8.7
Occupancy rating (bedrooms) of -1 or less	9.1 (695)	6.2	2.3	3.3	4.8

Average household size

.

The size of a household is equal to the number of usual residents in the household. Visitors staying at an address do not contribute to that household's size because they are counted in the household of their place of usual residence. Household size is only applicable to household spaces with at least one usual resident.

Qualifications

The qualifications classification enables estimates to be produced of the percentage of the population obtaining the highest level of the academic and vocational or professional qualifications. Although not a new question in 2011, some of the qualifications estimates are not directly comparable with 2001. This is due to multiple factors including changes in the level assigned to some qualifications, and the addition of a foreign qualification tick-box. Data shown as a percentage of people aged 16+. (Numbers are shown in brackets).

Table: Census 2011 Qualifications
