Overview of the Census

The latest census was undertaken 27 March 2011. The first census in England and Wales was carried out in 1801 and has taken place every ten years (with the exception of 1941, during the second world war.) The census is not only a population count, but provides a wealth of information about our characteristics: how we live, who we are and how we work. The census results help government and local authorities to plan and run public services and identify the resources people need. Key areas include : housing; health care; transport and education. The census is used by central government for funding allocation. Please note that Nottinghamshire includes all the districts but excludes Nottingham City. The Office for the National Statistics plans and carries out the Census. Please include the following Copyright@ons.gov.uk when referencing the Census 2011 data.

Please note this profile contains only Census data, other data is available on Nottingham Insight from the profile library or the data library.

.A household space is the accommodation used or available for use by an individual household. Household spaces are identified separately in census results as those with at least one usual resident, and those that do not have any usual residents. A household space with no usual residents may still be used by short-term residents, visitors who were present on census night, or a combination of short-term residents and visitors. Vacant household spaces and household spaces that are used as second addresses are also classified in census results as household spaces with no usual residents.

A household is defined as one person living alone, or a group of people (not necessarily related) living at the same address who share cooking facilities and share a living room or sitting room or dining area. A household must contain at least one person whose place of usual residence is at the address. A group of short-term residents living together is not classified as a household, and neither is a group of people at an address where only visitors are staying.

All data shown as a percentage of households or household spaces. (Numbers are shown in brackets).

National Statistics Socio-economic Classification . The National Statistics Socio-economic Classification (NS-SEC) provides an indication of socio-economic position based on occupation. It is an Office for National Statistics standard classification. To assign a person aged 16 to 74 to an NS-SEC category their occupation title is combined with information about their employment status, whether they are employed or self-employed and whether or not they supervise other employees. Full-time students are recorded in the' full-time students' category. Data is shown as a percentage of 16 to 74 year olds. (Numbers are shown in brackets).

Qualifications The qualifications classification enables estimates to be produced of the percentage of the population obtaining the highest level of the academic and vocational or professional qualifications. Although not a new question in 2011, some of the qualifications estimates are not directly comparable with 2001. This is due to multiple factors including changes in the level assigned to some qualifications, and the addition of a foreign qualification tick-box. Data shown as a percentage of people aged 16+. (Numbers are shown in brackets).

Table: Census 2011 Qualifications			
	Bells Lane Estate	Nottingham	England
No formal qualifications	36.0 (817)	25.6	22.5
Level 1 qualifications (4 GCSE's or equivalent)	17.2 (391)	12.2	13.3
Level 2 qualifications (5 GCSE's or equivalent)	17.8 (403)	12.9	15.2
Level 3 qualifications (2 or more A-levels or equivalent)	10.4 (235)	18.6	12.4
Level 4 qualifications and above (Bachelors degree or equivalent, and higher qualifications)	10.6 (240)	21.9	27.4
Apprenticeship	2.4 (55)	2.3	3.6
Other qualifications including foreign qualifications	5.6 (128)	6.5	5.7
