Appendix 1: Steering Group Terms of Reference

Nottinghamshire County and Nottingham City
Pharmaceutical Needs Assessment (PNA) Steering Group

FINAL Terms of Reference – agreed 20/07/2017

PNA Purpose

Introduction

From April 2013 Health and Wellbeing Boards have been responsible for producing a Pharmaceutical Needs Assessment (PNA). The regulations state that each Health and Wellbeing Board must produce a revised PNA by April 2018. Nottingham City and Nottinghamshire County have chosen to undertake this work jointly in order to increase efficiencies although two separate PNAs will be published. A variety of stakeholders will need to make significant contributions to this work. Public Health Nottinghamshire County and Nottingham City will lead the development of the PNAs and keep up to date a statement of the needs for pharmaceutical services of the relevant populations.

Aims of the PNA

1. Identify the pharmaceutical needs of the population of Nottingham City and Nottinghamshire.
2. Support the decision making process for pharmacy applications (subject to regulation).
3. Support commissioning decisions in relation to pharmacy services.
4. To identify gaps in provision when mapped against health need.
5. To determine which directed services (advanced and enhanced) exempt applications (e.g. 100 hour pharmacies) must provide

The objectives of the PNA

1. To have a clear picture of the distribution and provision of essential and advanced pharmaceutical services in Nottingham City and Nottinghamshire
2. Provide a clear picture to commissioned and potential contractors of current service provision by community pharmacies and identify any gaps in provision
3. To facilitate the planning process of possible future community pharmaceutical service requirements as identified within the PNA
4. To enable robust commissioning decisions for enhanced services from community pharmacies where needs are identified
5. To facilitate the directing of enhanced services that community pharmacies under the „exempt" category within the current control of entry regulations (100 hour and wholly internet pharmacies) should provide.

The PNA will enable health and social care organisations in Nottingham City and Nottinghamshire to commission services from community pharmacy that meet local needs and deliver services that are demonstrated to be evidence based and value for money to enable community pharmacy to become an intrinsic element of the local health system.

The PNA will be used as a basis to determine future pharmaceutical service provision and market entry to support local health needs. It will also be used to take current stock of services and to identify gaps in current services relating to population health needs. The scope of services included is to be agreed.

Proposed Service Scope

- Community pharmacies
- Dispensing practices
- Appliance contractors
- Community pharmacies within hospitals
- Internet pharmacies

Steering group membership

The steering group will drive and oversee the development and production of both PNAs, in the appropriate timescales. The membership will consist of:

- Consultant in Public Health Medicine x2 (PNA Sponsor City and County)
- Public Health Manager x2 (City and County)
- Public Health Intelligence (City and County)
- NHS England Area Team Derbyshire and Nottinghamshire
- NHS England Area Team South Yorkshire and Bassetlaw
- Local Pharmaceutical Committee (LPC)
- County CCG representative (for the 5 CCGS) – Medicines Management
- City CCG representative – Medicines Management
- Local Medical Committee (LMC)

Accountability

The steering group will be accountable to both Nottingham City and Nottinghamshire County Health and Wellbeing Boards.

The group may delegate responsibility for delivery of specific areas of the PNA to subgroups e.g. PNA working group or specific task and finish groups.

Responsibilities of all partners

Partners will agree the action plan and assist in the delivery of interventions in their locality and for their client group.

Meetings and communication

Meetings will be held bi-monthly or as required at venues accessible to all partners. The Steering Group will also utilise virtual meeting technology and the public sector online collaboration platform, Knowledge Hub to maximise efficiency.

Chair

The group will be chaired on an alternating basis by Jonathan Gribbin and Rachel Sokal (Consultants in Public Health Medicine, Nottinghamshire County and Nottingham City).

Quoracy

Meetings will be deemed quorate when one third of the membership is present.

Administration

Public Health, Nottinghamshire County and Nottingham City will provide admin support.

3. Results
4. Common themes arising
5. Conclusion

INTRODUCTION

The Pharmaceutical Needs Assessment (PNA) outlines services commissioned by pharmacies and ensures that pharmaceutical services across Nottingham City meet the needs of the population and are in the correct locations.

When making an assessment for the purposes of publishing a PNA, and in line with Section 8 of The National Health Service (Pharmaceutical and Local Pharmaceutical Services) Regulations 2013, Nottingham City Council carried out a 60 day consultation on the first draft of the PNA between 13 November 2017 and 12 January 2018.

METHODOLOGY

A formal consultation exercise was carried out to obtain the views of a range of interested parties, as stated in the pharmacy regulations. The steering group also agreed to consult the local Clinical Commissioning Groups (CCGs) and GP practices. The consultation was also open to citizens and other organisations not listed. The full list of consultees is:

- Nottinghamshire Local Pharmaceutical Committee (LPS)
- Nottinghamshire Local Medical Committee (LMC)
- Persons on the Pharmaceutical List in Nottingham City
- LPS Chemists in Nottingham City
- Nottingham Healthwatch
- Nottingham Community and Voluntary Service
- Other patient, consumer or community groups with an interest in provision
- NHS Trust and NHS Foundation Trusts in the area (Nottingham University Hospitals NHS Trust, Nottinghamshire Healthcare NHS Trust, East Midlands Ambulance Service)

- Nottingham CityCare Partnership
- NHS England North Midlands
- Nottinghamshire County Health and Wellbeing Board
- Nottingham City CCGs
- Nottingham City GPs

The consultation was placed on the Engage Nottingham Hub alongside the draft PNA and appendices. A name, email and phone number was listed for anyone needing a paper copy or help completing the survey. Colleagues at Healthwatch and NCVS circulated the email to groups and partner organisations, targeting ones representing those who may have a higher need for pharmaceutical services, such as people with long term conditions. There was a Health and Wellbeing Board report for information on the consultation and partner organisations were asked to circulate to colleagues, partners, patients, clients or service users.

The process attracted 30 submissions (28 on-line and 2 email responses were received) and generated response from the following:

- The Local Pharmaceutical Committee (LPC)
- The Local Medical Committee (LMC)
- General Practitioners (GPs)
- Pharmacies
- Members of the public

This report summarises responses and identifies a number of themes. It also explains what action has been taken, where necessary.

RESULTS

The process attracted 30 submissions (28 on-line and 2 email responses were received) and generated response from the following:

- The Local Pharmaceutical Committee (LPC)
- The Local Medical Committee (LMC)
- General Practitioners (GPs)
- Pharmacies
- Members of the public

The following results relate to the 28 responses received via the Engage Hub. Ones received by email are discussed separately. 23 of the responses were from members of the public and 5 responded on behalf of an organisation.

Consultees were asked to agree, neither agree nor disagree or disagree with the following statements:

1) *The PNA provides sufficient information to assess the current and future ((3 years ahead) pharmaceutical need in each Care Delivery Group (also referred to as Local Area Committees). Please see page 24 and 25 of the draft PNA for more details.*

2) *The recommendations within the PNA reflect the assessment of pharmaceutical need.*

Statement 1 received 20 responses agreeing, 7 neither agreed nor disagreed and 1 disagreed that sufficient information had been provided to assess pharmaceutical need.

Statement 2 received 18 responses in agreement, 6 neither and 4 disagreed that the recommendations reflect the assessment of pharmaceutical need.

All the comments received, including those submitted by email have been collated and analysed by emerging themes. Consultation results were discussed at steering group and actions agreed where necessary.

COMMON THEMES ARISING

Theme A – Housing

One respondent commented that new housing developments may increase population between 5-11%, which would be a challenge for ever pressured pharmacies.

Our response: Housing projections are merely forecasts of planned developments, which may or may not be built during the lifetime of the PNA. Pharmaceutical need relates more to the types of people living in a certain area rather than numbers alone. For example, older people with long term conditions are likely to have higher need for pharmaceutical services than a younger student population.

Theme B – Information

There was a suggestion to include an executive summary and to make the PNA more accessible to young people, those with a learning disability and those for whom English is not a first language. Other comments queried the reference to the maps on pages 24 and 25 and one response said the information was difficult to understand, so not sure what is intended to be conveyed. There were also several comments pointing out specific data errors or changes since the consultation draft was published.

Our response: An executive summary was included and further help, paper copies and translations were made available if requested. None were requested. Whilst attempts were made to make the PNA as accessible as possible, its main purpose is to help NHS England assess need for pharmacy services over the next 3 years. This necessitates a reasonably detailed picture of the city. Data changes and inaccuracies have been verified and amended.

Theme C – Services

Specific comments were received regarding the variability of services in a particular locality and a query regarding lack of late night provision. Several comments related to services that could be offered, permission to open a pharmacy in a certain locality and that there should be more dispensing appliance contractors (DACs). There was also a comment about pharmacy funding changes resulting in pharmacy and GP closures and the knock-on effects.

Our response: PNA regulations do not specify market viability but it is nevertheless important regarding the provision of pharmaceutical services. In other words, if there is not enough demand for a community pharmacy, it will be difficult to make the business work. Late night provision of community pharmacies depends on several factors, including willingness of pharmacy staff to open late, local demand and need for security. This means that late night pharmacies tend to be located within large supermarkets or joint service centres. The steering group agreed that current provision of DACs in the city is ample.

There are uncertainties regarding the impact of the reduction in central government funding for community pharmacies and other pressures, such as rent increases on premises, which may result in pharmacies or GP practices closing. The steering group agreed that the closure of one pharmacy in a locality has the potential to be absorbed, however if two or more were to close, this could have significant consequences for the provision of pharmaceutical services. This would need to be raised at Health and Wellbeing Board and trigger a revision of the PNA.

CONCLUSION

Overall, the PNA consultation was positive, with the majority of respondents agreeing that the information provided was sufficient to assess pharmaceutical need and that the recommendations were appropriate. The PNA steering group met on 24th January 2018 and provisionally signed off the draft 2018 PNA for Nottingham City. The group agreed that the joint city-county steering group and an ability to have early and ongoing input meant that there were relatively few consultation comments received.

screentip-sectionB

Brief description of proposal / policy / service being assessed:

The Health and Wellbeing Board (HWBB) has statutory responsibility to produce a Pharmaceutical Needs Assessment (PNA) under the Health and Social Care Act (2012). Nottingham City HWBB produced its first PNA in 2015. A revised PNA must be published by 1 April 2018 and is expected to last for a maximum of 3 years.

The PNA outlines pharmaceutical services provided by community pharmacies, and dispensing appliance contractors. The document ensures that services meet the needs of the population and are in the correct locations to support the citizens of Nottingham. This will inform decisions when applications for new pharmacies are received (via NHS England) and for commissioning new services (by NHSE; CCG and Nottingham City Council).

Pharmaceutical services in relation to PNAs include:

- Essential services provided by every community pharmacy providing NHS services, such as dispensing prescription medicines
- Advanced services – services community pharmacy contractors and dispensing appliance contractors (DACs) can provide subject to accreditation as necessary – these include Medicine Use Reviews for community pharmacists
- Locally commissioned services (Enhanced services) commissioned by NHS England or local authority Public Health services

The PNA includes an overview of pharmacy regulations with regard to pharmaceutical needs assessment in addition to a review of the range of pharmaceutical services currently provided or which may be commissioned in future. A comprehensive range of sources was used to describe the health and social conditions of the population in Nottingham city. This was broken down into Care Delivery Group areas (these are co-terminus with Local Area Committees), including details of:

- Population demographics: age, deprivation, ethnicity and health needs

- Number and location of community pharmacies and DACs and the services commissioned
- Analysis of any gaps in necessary services
- Analysis of any gaps in locally commissioned services or access to services
- Impact of population changes and house building
- A description of any NHS service (or similar) which may affect pharmaceutical need
- Formal consultation on final draft PNA

The preparation of the revised PNA involved a county-wide steering group and working group, which included representatives from the Local Pharmaceutical Committee, Local Medical Committee, NHS England and Nottingham City Clinical Commissioning Group Medicines Management. Two separate PNAs have been produced for the City and County but the group took advantage of economies of scale to prepare documents simultaneously.

.

screentip-sectionC

Information used to analyse the effects on equality:

A formal 60 day consultation closed recently – please see the Engage Nottingham Hub.

Nottingham City Health and Wellbeing Board have a legal duty under Section 8 of the National Health Service (Pharmaceutical and Local Pharmaceutical Services) Regulations 2013 to consult with named organisations as well as the citizens of Nottingham on the findings and recommendations for pharmacy services provision.

The Regulations require that the following organisations were consulted on the draft PNA. In addition the PNA steering group agreed to consult Nottingham City and Nottinghamshire CCGs and GP practices. The full list of consultees is:

- Nottinghamshire Local Pharmaceutical Committee (LPS)
- Nottinghamshire Local Medical Committee (LMC)
- Persons on the Pharmaceutical List in Nottingham City
- LPS Chemists in Nottingham City
- Nottingham Healthwatch
- Nottingham Community and Voluntary Service
- Other patient, consumer or community groups with an interest in provision
- NHS Trust and NHS Foundation Trusts in the area (Nottingham University Hospitals NHS Trust, Nottinghamshire Healthcare NHS Trust, East Midlands Ambulance Service)

- Nottingham CityCare Partnership
- NHS England North Midlands
- Nottinghamshire County Health and Wellbeing Board

Responses from citizens and other organisations not listed were also welcomed.
The consultation ran for 60 days from 13th November 2017 to 12th January 2018. The consultation appeared as a live consultation on the Engage Nottingham Hub during this time. There was an electronic link to the draft PNA and appendices.
A name, email and phone number was listed for anyone needing a paper copy or help completing the survey. Colleagues at Healthwatch and NCVS kindly circulated to groups and partner organisations, targeting ones representing those who may have a higher need for pharmaceutical services, such as people with long-term conditions. In addition, there was a Health and Wellbeing Board report for information on the consultation, and HWBB members were asked to respond and circulate to colleagues, partners, patients, clients or service users.

For the organisations that were formally consulted, they received a joint email from Councillor McDonald and Councillor Doddy, the respective chairs of the Nottingham City and Nottinghamshire County Health and Wellbeing Boards. There was a reminder email in mid-December and a final reminder in early January 2018. The consultation also appeared as a news item on the My Nottingham News website, in the Nottinghamshire Local Pharmaceutical Committee newsletter and the Health and Wellbeing e-newsletter. There was a link from the Nottingham Insight website where the current PNA is located, this also targeted people looking for Joint Strategic Needs Assessments (JSNAs).

28 respondents completed the consultation questionnaire, of which 23 were responding as a member of the public and 5 were responding on behalf of an organisation.

Pregnancy/ Maternity
People of different faiths/ beliefs and those with none.
Lesbian, gay or bisexual people.
Older
Younger
Other (e.g. marriage/ civil partnership, looked after children, cohesion/ good relations, vulnerable children/ adults). People with long-term conditions such as diabetes, asthma. ***Please underline the group(s) /issue more adversely affected or which benefits.***

screentip-sectionE **How different groups could be affected** (Summary of impacts)	screentip-sectionF **Details of actions to reduce negative or increase positive impact** (or why action isn't possible)
Provide details for impacts / benefits on people in different protected groups.	1 **Actions will need to be uploaded on Covalent.**

Older people and those with long-term conditions and their carers are most likely to use pharmaceutical services (steering group agreement) so are the groups who may be adversely impacted if there were any gaps in provision or reduction in particular services. **Older people** As people age, they are more likely to be prescribed four or more medications. This may be due to several long term conditions which require ongoing medical management and resultant prescription medication and/or continence or stoma appliances **People with long term conditions** Long term or chronic conditions refer to conditions that cannot be cured but may be managed by medication or other therapies, for example asthma, diabetes, dementia or high blood pressure. **Carers** The carers or family members of older people and those with long-term conditions are often involved in liaison between the GP, pharmacist and/or dispensing appliance contractor. This may involve visits, telephone calls and electronic requests for pharmaceutical services, arranging home visits or collecting prescriptions. These three groups would therefore be adversely if there were any gaps in provision or reduction in particular pharmaceutical services. They would be more likely to use the range of essential, advanced and locally commissioned services, particularly: • Dispensing and repeat dispensing of prescription medicines and appliances • Medicine Use Review (which help to resolve problems where multiple medications are taken) • Stoma appliance customisation • Urgent Medicine Supply Service and Emergency Supply service • Influenza vaccination (older people and those with long term conditions are in the 'at risk' group) **Consultation results**	The final version of the 2018 Pharmaceutical Needs Assessment is due to be completed by early March 2018. It will be presented at Health and Wellbeing Board on 28 March and must be published by 1st April 2018. The 2018 PNA for Nottingham City was provisionally signed-off at the PNA steering group on 24th January 2018. The group agreed that the joint city-county steering group and an ability to have early and ongoing input meant that there were relatively few consultation comments received. The provisional recommendation to HWBB is that ''the current balance of community pharmacies and dispensing appliance contractors provide a comprehensive range of services to their local populations. Analysis of health needs and public consultation did not provide any evidence of a lack of provision of pharmaceutical services in existing pharmacies. Housing projections in the short to medium term (3-5 years) are not expected to increase the local population to a level that would affect the ability of current providers to meet the pharmaceutical need. The PNA will be reviewed in 2021 or before if there is a substantial change in need or supply, e.g. if planned housing developments result in greater than expected population numbers.'' (page 5).

71% of respondents to the consultation agreed that the draft Pharmaceutical Needs Assessment provided sufficient information to assess the current and future (3 years ahead) pharmaceutical need in each Care Delivery Group. Only 1 person disagreed, commenting that presentation of the information was difficult to understand, so they were not sure what information was intended to be conveyed.

63% agreed that recommendations reflected the assessment of pharmaceutical need. There was also space for further comments. Comments and actions if required are listed below:

Comment	Action
Confusion over reference to p24 and 25	This related to the city map outlining CDG areas. No action necessary.
Housing developments may increase population by 5-11%	See note below. No action necessary.
Specific comment relating to permission to open a pharmacy in a certain locality	Discussed at PNA steering group. There are 3 other community pharmacies within a mile radius- not market viable. No action necessary.
Suggestion to include an executive summary and to make it more accessible to young people, those with a learning disability and those for whom English is not a first language.	An executive summary was included and further help, paper copies and translations were made available if requested. None requested.
Query there should be more dispensing appliance contractors	Steering group agreed current provision was ample.
Comment from pharmacist welcoming COPD screening	Noted and no further action necessary
Specific comments regarding variability of services in a particular locality and query of lack of late night provision.	Discussed at PNA steering group. See note below. Noted and no further action necessary

Revised assessment
The 2013 Regulations also state that a HWBB must make a revised assessment if any significant changes arise within the three-year period, such as the closure of several community pharmacies in a locality. In this instance, the PNA steering group would reform and the production of a revised PNA started as soon as 'reasonably practicable'. Colleagues at NHS England email any notifications of pharmacy changes.

Supplementary statements
For smaller changes, such as a change of pharmacy ownership, or small changes in opening hours, this triggers the publication of Supplementary statements. These are published quarterly on Nottingham Insight. All the 68 community pharmacists in Nottingham city also publish opening hours etc. on the NHS Choices website.

Issues: a) Housing projections are merely forecasts of planned developments, which may or may not be built during the lifetime of the PNA. Pharmaceutical need relates more to the types of people living in a certain area rather numbers alone. b) PNA regulations do not specify market viability but it is nevertheless important regarding the provision of pharmaceutical services. In other words, if there is not enough demand for a community pharmacy, it will be difficult to make the business work. c) Whilst attempts were made to make the PNA as accessible as possible, its main purpose is to help NHS England assess need for pharmacy services over the next 3 years. This necessitates a reasonably detailed picture of the city. d) Late night provision of community pharmacies depends on several factors, including willingness of pharmacy staff to open late, local demand and need for security. This means that late night pharmacies tend to be located within large supermarkets or joint service centres. d) There is an average of 2.1 pharmacies per 10,000 population in Nottingham city, which is the same as the England average (NB There is no minimum density prescribed by law). Residents in each CDG area have access to a minimum of four pharmacies. However when interpreting access, it must be noted that CDG areas are administrative boundaries and may not necessarily relate to where local people access services, especially as the city has excellent bus, tram and train services. **Future issues** Since the consultation, several Nottingham City Council budget proposals to reduce the provision of Public Health services have been made, including ones delivered by community pharmacies. Separate Equality Impact Assessments have been made for each service affected, for example sexual health services. The outcome of these decisions will not be fully realised before the PNA is published (see note on Supplementary Statements opposite). There are also uncertainties regarding the impact of the reduction in central government funding for community pharmacies and other pressures, such as rent increases on premises, which has the potential to result in pharmacies or GP practices closing. The steering group agreed that a closure of one pharmacy in a locality has the potential to be absorbed, however if two or more were to close, this could have significant consequences	

for the provision of pharmaceutical services. This would need to be raised at HWBB and trigger a revision of the PNA (see opposite).	

Has consultation been done or planned for this proposal? •Completed ☒ •Planned ☐ **screentip-sectionG**

Has human rights legislation been considered in this proposal? •Yes ☒ •No ☐ **screentip-sectionH**

Outcome(s) of equality impact assessment:

•No major change needed ☒ •Adjust the policy/proposal ☐ •Adverse impact but continue ☐

•Stop and remove the policy/proposal ☐

Arrangements for future monitoring of equality impact of this proposal / policy / service:
Note when assessment will be reviewed (e.g. Review assessment in 6 months or annual review); Note any equality monitoring indicators to be used; consider existing monitoring/reporting that equalities information could form part of.
