Nottingham City Council

Department for Communities and Local Government, Indices of Deprivation 2015

Summary

DCLG published the English Indices of Deprivation 2015 on 30th September 2015.

The Indices of Deprivation measure *relative* levels of deprivation in 32,844 small areas or neighbourhoods, called Lower Super Output Areas, in England. Each area is given a score and a rank for seven distinct domains of deprivation which are combined to calculate the overall Index of Multiple Deprivation. Summaries are also provided at a Local Authority district level.

Below is a brief summary of the results for Nottingham City.

The Index of Multiple Deprivation District Results

Nottingham ranks 8th most deprived out of the 326 districts in England using the Average Score measure and 10th using the Average Rank measure.

This compares with ranks of 20th and 17th out of 326 districts in the 2010 index and 13th and 12th out of 354 districts in the 2007 index.

Local Authorities which rank as more deprived than Nottingham using the Average Score measure are Blackpool; Knowsley; Kingston upon Hull; Liverpool; Manchester; Middlesbrough and Birmingham - which all ranked as more deprived than the City in 2010.

The Index of Multiple Deprivation Lower Super Output Area Results

In the Index of Multiple Deprivation, 61 of the 182 City Lower Super Output Areas (LSOAs) fall amongst the 10% most deprived in the country. 110 fall in the 20% most deprived. This compares to 45 and 91 of 176 LSOAs in the 2010 indices.

The lowest ranking LSOA in the City is in Bulwell, which ranks 63rd nationally out of 32,844, and is one of two City LSOAs ranking in the most deprived 100 SOAs in the country – the other being in Aspley, ranking 78th.

7 LSOAs in the City rank in the 20% least deprived in the country.

All of the LSOAs in Aspley rank in the 10% most deprived. In the 2010 indices, all bar one of the LSOAs in Aspley were amongst the most 10% deprived.

'Domain' Results

In the **Income** Deprivation Domain, 54 out of 182 LSOAs in the City now rank amongst the 10% most deprived in the country, compared to 40 in 2010 and 44 in the 2007 indices. All of the LSOAs in Aspley are in the most deprived 10%.

In the **Employment** Deprivation domain, 54 SOAs rank amongst the 10% most deprived, compared to 34 in 2010 and 35 in 2007. Only one ward – Aspley – has all LSOAs in the most deprived 20%.

In the **Health and Disability** Domain, 63 of the 182 City SOAs rank in the 10% most deprived, compared to 55 (of 176) in 2010 and 70 in 2007.

62 LSOAs fall in the 10% most deprived in the country for **Education, Skills and Training** Deprivation. This compares with 60 LSOAs in 2010 and 72 in 2007.

16 LSOAs in the City rank amongst the 10% most deprived of the country in terms of **Barriers to Housing and Services**. The pattern remains very different to most of the other domains because geographical access to services is less restricted in urban areas.

56 LSOAs rank within the 10% most deprived in the country for **Crime** compared to 87 in 2010 and 134 in 2007. 92 are in the 20% most deprived. Arboretum ward has all LSOAs in the 10% most deprived in the country.

33 LSOAs rank in the 10% most deprived for **Living Environment** Deprivation.

Sub-domain Results

68 City SOAs fall within the 10% most deprived in the country for **Income Deprivation affecting Children**, with 108 in the most deprived 20%. This compares to 57 and 99 in the 2010 indices. All of the LSOAs in Aspley are in the most deprived 10%.

For **Income Deprivation affecting Older People**, 48 SOAs rank amongst the most deprived 10%, and a total of 95 rank in the most deprived 20%. In 2010 these figures were 54 and 92 respectively.

Results for Nottingham City

Background

The Department for Communities and Local Government (DCLG) commissioned the Social Disadvantage Research Centre at the University of Oxford to update the English Indices of Deprivation 2010. The new Indices of Deprivation 2015 were published on 30th September 2015.

What are the Indices of Deprivation?

The Indices of Deprivation measure relative levels of deprivation between small areas in England. Summaries are also provided at a Local Authority district level.
The Indices allow areas in England to be compared, and show how areas have changed over time relative to other areas. They do not show whether areas have become more or less deprived in real terms.
The Indices of Deprivation measure a broad concept of deprivation, made up of several distinct dimensions, rather than just financial deprivation. The dimensions (domains) combine to give an overall 'Index of Multiple Deprivation'.

Methodology

The methodology used for the 2015 Indices is very similar to that used for previous Indices. A range of statistical indicators have been collected and grouped under **seven domains**.
In the 2015 Indices, there have been a few minor changes to some indicators used in the creation of domains. Details of the indicators that make up each domain are included in Appendix D.

The overall score, the Index of Multiple Deprivation (or IMD), is calculated from the domain results. Some domains carry more weight in the overall score than others. The table below shows the domains and the weights assigned to them to produce the IMD. The weights have remained the same since the 2004 Indices.

Table 1: Domain and Weights for the IMD 2010

Domain	Domain weight
Income deprivation	22.5%
Employment deprivation	22.5%
Health deprivation and disability	13.5%
Education, skills and training deprivation	13.5%
Barriers to housing and services	9.3%
Crime	9.3%
Living environment deprivation	9.3%

In addition, the two supplementary age-specific Indices (Income Deprivation Affecting Children and Income Deprivation Affecting Older People) have again been published.

Most of the indicators relate to 2012 and the majority of denominators are taken from the 2012 mid year estimates.

The units for analysis are **Super Output Areas** (SOAs). There are 182 in the City (up from 176 following the 2011 Census), and the majority have a population of between 1,300 and 1,700. Each of the 32,844 SOAs in England has been assigned a score and rank for the IMD, the seven domains and the two supplementary Indices. Detailed SOA results for the City are mapped in Appendix A, and included in a tabulated format in Appendix B.

All SOAs have a nine-character reference number, but have not been given official names. In order that these may be identified a reference map is included in Appendix A. The map labels correspond to the last three digits of the reference numbers. Where SOAs are referred to in

the body of the report, an approximate description of the location has been included. This description is for guidance only.

Six **district** level summary measures of the IMD 2015 have been produced, as in the previous three Indices. Further details are included in the section below.

DCLG have not published results for **wards,** however these have been estimated as described on page 16.

The Index of Multiple Deprivation District Results

Nottingham ranks 8th out of the 326 districts in England using the Average Score measure (the average score of the district's SOAs) on the IMD, fall of 12 places from its position as the 20th most deprived LA in 2010. The Top 20 most deprived districts using this measure are shown in Table 2.

The other measures are explained below:

- Nottingham ranks 10th using the **Average Rank**, a fall from 17th in 2010.
- Nottingham ranks 8th for the **proportion of LSOAs in the most deprived 10% nationally**.
- **Extent** is the proportion of the district's population living in the most deprived LSOAs in the country. Nottingham ranks 7th using this measure (previously 17th).
- **Local Concentration** is the population weighted average of the ranks of the district's most deprived LSOAs that contain 10% of the district population. Nottingham ranks 26th (previously 35th).
- The **Income Scale** and the **Employment Scale** measure the number of people experiencing deprivation. Nottingham ranks 12th and 10th respectively (previously 17th and 13th).

Using the Average Score, Blackpool is the most deprived authority in England. Nottingham remains the fourth most deprived of the Core Cities after Liverpool (4th), Manchester (5th) and Birmingham (7th). The others are ranked as follows: Newcastle 53rd; Sheffield 60th; Bristol 62nd; and Leeds 70th. Leicester and Derby are ranked 21st and 55th respectively. Nottingham ranks as 8th most deprived in the rank of just the 152 Upper Tier Authorities.

Table 2: Top 20 Local Authority district summaries, 2015

Local Authority District	Rank of average score	Rank of average rank	Rank of proportion of LSOAs in most deprived 10%	Rank of extent	Rank of local concentration	Income - Rank of scale	Employment - Rank of scale
Blackpool	1	4	7	12	1	68	61
Knowsley	2	5	2	4	3	56	54
Kingston upon Hull	3	9	3	8	5	17	13
Liverpool	4	7	4	2	7	4	2
Manchester	5	1	5	1	11	2	4
Middlesbrough	6	16	1	5	2	64	63
Birmingham	7	11	6	6	21	1	1

Change in District Results

In the 2010 Indices, Nottingham City was ranked as the 20th most deprived local authority using the average score measure. The City is now ranked 8th. Although this *may* represent a real decline for the residents of Nottingham, it is important to note that the Indices of Deprivation are not an absolute measure of deprivation and that change over time is relative to other areas.
Possible reasons for the change in rank are discussed below:

12 authorities ranked as more deprived than Nottingham in 2010 but are now relatively less deprived than the City. These 12 authorities can be broadly divided into two groups: a) six London boroughs which experienced relatively large improvements in their ranking between 2010 and 2015 and b) six other authorities whose ranking stayed broadly the same.

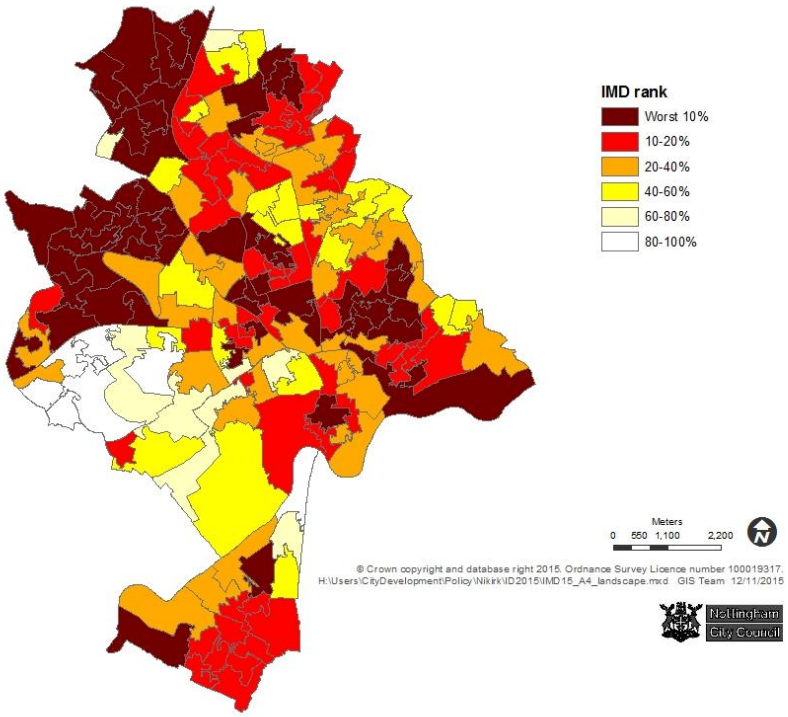

a) The relative improvements of the six London Boroughs (Hackney, Newham, Tower Hamlets, Haringey, Islington and Waltham Forest) appear to be due to a mixture of when the data was collected and the disproportionate effects of the recession and recovery in different parts of the country. The 2010 Index largely took data from the start of the recession in 2008, whereas the 2015 Index took data from 2012 – when London was staring to recover but the rest of the country had yet to do so.

b) The relative improvements of the six other Local Authorities (Blackburn with Darwen, Burnley, Hastings, Salford, Sandwell and Stoke on Trent) appear to be mostly due to large falls in Nottingham's ranking in the 'Barriers to Housing and Services' Domain. This Domain has seen a methodological change in 2015 with the inclusion of private rented housing in the measure of housing affordability (which looks at the incomes of people under 40 and compares it to the cost of housing in the area). In previous indices, the indicator has solely measured affordability of owner occupation and Nottingham will have fared relatively well as house prices in the City tend to be lower than average. However, average rents in Nottingham are relatively high due to the large proportion of the City's population who are university students. These same students are also likely to have very low incomes. This will translate in the figures as Nottingham being viewed as relatively unaffordable. Nottingham's tightly drawn boundaries and high concentration of students within the City mean that the impact is exaggerated here but Manchester, which has similar issues to Nottingham in this regard, also saw a large fall down the rankings in this Domain.

The Index of Multiple Deprivation Super Output Area Results

Map 1, shows how the City SOAs rank out of the 32,844 in England. As with the maps produced in 2004, 2007 and 2010, the darkest shaded areas are those that rank amongst the 10% most deprived in the country. In the past, this has proved a common method of determining an area's eligibility for government grants and additional funding. Those in the next category (10-20%) are also eligible in many cases.

Map 1: National Ranking of City Super Output Areas, 2015

Source: Department for Communities and Local Government, 2015
Please note: A larger map is included in Appendix A.

A third of the 182 City LSOAs are amongst the 10% most deprived in the country, an increase on 2010 where a quarter fell into this band but a similar proportion to 2007 where 32% fell in this band. 60% of LSOAs are in the worst 20%.
Seven City LSOAs are amongst the 20% *least* deprived in the country.

Results from the 2015 Index of Multiple Deprivation (IMD) are summarised below, in Tables 3 to 5. 2010 ranks are also given for comparison.

Table 3: The Extent of Extreme Multiple Deprivation

	2015	***2010***	***2007***	***2004***
City LSOAs in worst 10% nationally	61	*45*	*56*	*79*
City LSOAs in worst 20% nationally	110	*91*	*106*	*115*

Table 4: LSOAs Most Affected by Multiple Deprivation

City rank	**Ref**	**Location**	**Ward**	**National Rank 2015**	***National Rank 2010***
1	E01013877	Bulwell Centre S	Bulwell	63	*119*
2	E01013818	Broxtowe Estate NW	Aspley	78	*97*
3	E01013861	Bilborough East	Bilborough	103	*617*
4	E01013817	Broxtowe Estate NE	Aspley	145	*497*
5	E01033411	St Ann's Plantagenet Street	St Ann's	157	*New LSOA in 2011*

Table 5: Wards Affected by Extreme Levels of Multiple Deprivation

City wards with all LSOAs in the worst 10% nationally	Aspley
City wards with all LSOAs in the worst 20% nationally	-

Source for Tables 3-5: Department for Communities and Local Government, 2015

One City ward, Aspley, has all LSOAs ranking in the 10% most deprived in the country. As in previous Indices, the more deprived LSOAs continue to be concentrated in the estates to the north and west of the City, and to the east of the city centre.

Change in Super Output Area Results

Following the 2011 Census a number of LSOAs in the City changed. Due to population changes, some old LSOAs were split into two so they did not exceed the maximum population threshold for a LSOA, and others were merged. The 2015 Indices of Deprivation use 2011 based LSOAs (182 in the City) and the 2010 Indices of Deprivation used 2001 based LSOAs (176 in the City). As such, comparisons between the two Indices cannot be made for all LSOAs, but can be made for the 162 City LSOAs which remained the same after 2011.

Of the 162 'static' LSOAs, 49 LSOAs improved in rank between the two indices, and 133 worsened in rank.

In terms of the decile each LSOA ranked within,

- 48 LSOAs worsened in rank enough to fall into a more deprived decile nationally, with 15 falling into the worst 10% nationally.
- 14 LSOAs improved in rank enough to improve their decile, with two LSOAs moving out of the most deprived 10% nationally.
- 100 LSOAs continued to rank within the same decile as in 2010.

Super Output Area Results by Domain

The following sections summarise the headline results for each type of deprivation. Maps and tables containing all City LSOA results are included at the end of this report, in Appendices A and B.

Income Deprivation

30% of LSOAs are amongst the 10% most deprived nationally, a slight increase on 2010 where under a quarter of City SOAs fell into this band. Just over half are in the worst 20%, again, a slight increase on 2010. 13 City SOAs are in the 20% least income deprived nationally, with eight ranking amongst the 10% *least* deprived on this domain.

Results from the Income Deprivation domain are summarised below, in Tables 6 to 8.

Table 6: The Extent of Extreme Income Deprivation

	2015	***2010***	***2007***	***2004***
City LSOAs in worst 10% nationally	54	*40*	*44*	*64*
City LSOAs in worst 20% nationally	96	*83*	*85*	*93*

Table 7: LSOAs Most Affected by Income Deprivation

City rank	Ref	**Location**	**Ward**	**National Rank 2015**	***National Rank 2010***
1	E01013818	Broxtowe Estate NW	Aspley	13	*26*
2	E01013817	Broxtowe Estate NE	Aspley	124	*334*
3	E01013877	Bulwell Centre S	Bulwell	125	*496*
4	E01013826	Bells Lane W	Aspley	209	*223*
5	E01013861	Bilborough East	Bilborough	223	*988*

Table 8: Wards Affected by Extreme Levels of Income Deprivation

City wards with all LSOAs in the worst 10% nationally	Aspley
City wards with all LSOAs in the worst 20% nationally	-

Source for Tables 6-8: Department for Communities and Local Government, 2015

One ward, Aspley is comprised entirely of SOAs in the worst 10% for Income deprivation. As in 2010, the ward contains the worst ranking City LSOA – 13th out of 32,844 LSOAs in the country.

Employment Deprivation

The patterns of income and employment deprivation are similar. 30% of LSOAs are in the worst 10% nationally, and half are in the worst 20%.

Results from the Employment Deprivation domain are summarised below, in Tables 9 to 11.

Table 9: The Extent of Extreme Employment Deprivation

	2015	***2010***	***2007***	***2004***
City LSOAs in worst 10% nationally	54	*34*	*35*	*40*
City LSOAs in worst 20% nationally	92	*72*	*73*	*90*

Table 10: LSOAs Most Affected by Employment Deprivation

Table 11: Wards Affected by Extreme Levels of Employment Deprivation

City wards with all LSOAs in the worst 10% nationally	-
City wards with all LSOAs in the worst 20% nationally	Aspley

Source for Tables 9-11: Department for Communities and Local Government, 2015

There are no City wards where all of the SOAs are amongst the 10% most employment deprived nationally. Aspley ward has all of its LSOAs in the 20% most deprived nationally.

There are areas of extreme employment deprivation in the estates to the north and west, and in St Ann's. As in previous Indices, the areas displaying the least employment deprivation are concentrated around Wollaton the University of Nottingham.

Health Deprivation and Disability

Nottingham's performance remains poor for the Health Deprivation and Disability Domain, despite having a relatively young population. Just over a third of the 182 City SOAs are in the worst 10%, and nearly two thirds are in the worst 20%.

Results from the Health Deprivation and Disability domain are summarised below, in Tables 12 to 14.

Table 12: The Extent of Extreme Health Deprivation and Disability

	2015	*2010*	*2007*	*2004*
City LSOAs in worst 10% nationally	63	*55*	*70*	*85*
City LSOAs in worst 20% nationally	119	*111*	*122*	*130*

Table 13: LSOAs Most Affected by Health Deprivation and Disability

Table 14: Wards Affected by Extreme Levels of Health Deprivation and Disability

City wards with all LSOAs in the worst 10% nationally	-
City wards with all LSOAs in the worst 20% nationally	St Ann's

Source for Tables 12-14: Department for Communities and Local Government, 2015

St Ann's ward has all 9 LSOAs in the worst 20% in the country. 19 out of 20 City wards have at least one LSOA in the worst 20% in terms of health deprivation.

Education, Skills and Training Deprivation

Over a third of City LSOAs rank within the worst 10% of the country for Education, Skills and Training Deprivation. Four LSOAs in Aspley and Bulwell rank in the worst 100 in the country.

Results from the Education, Skills and Training Deprivation domain are summarised below, in Tables 15 to 17.

Table 15: The Extent of Extreme Education, Skills and Training Deprivation

	2015	***2010***	***2007***	***2004***

Table 17: Wards Affected by Extreme Levels of Education, Skills and Training Deprivation

City wards with all LSOAs in the worst 10% nationally	Aspley
City wards with all LSOAs in the worst 20% nationally	-

Source for Tables 15-17: Department for Communities and Local Government, 2015

As with the 2004, 2007 and 2010 Indices, all of the SOAs in Aspley ward are in the worst 10% nationally.
There are concentrations of extreme education deprivation to the north and west of the City. Although there is less of a concentration in the inner city than in some domains, there are still areas of extreme education deprivation in St Ann's.

Barriers to Housing and Services

Unlike previous Indices, where very few LSOAs ranked amongst the most deprived in the country for this domain, in 2015, a methodological change in indicators has meant that 16 LSOAs now rank amongst the most deprived 10% nationally, and 42 in the most deprived 20%.

Results from the Barriers to Housing and Services domain are summarised below, in Tables 18 to 20.

Table 18: The Extent of Barriers to Housing and Services

	2015	***2010***	***2007***	***2004***

Crime

Crime has seen an improvement on previous indices. 2 SOAs are in the worst 100 in the country, compared to 5 in the 2010 Indices. Just under a third of City LSOAs are in the worst 10%, compared to a half in 2010. Just over half are in the worst 20%.

Results from the Crime domain are summarised below, in Tables 21 to 23.

Table 21: The Extent of Crime

	2015	***2010***	***2007***	***2004***
City LSOAs in worst 10% nationally	56	*87*	*134*	*134*

All the SOAs in Arboretum are in the worst 10% nationally.

Living Environment Deprivation

Unlike previous indices, Nottingham ranks poorly for Living Environment deprivation, and has the 2nd most deprived LSOA in the country on this domain – in St Ann's.
Nearly one fifth of LSOAs fall within the most deprived 10% nationally and nearly a third fall within the most deprived 20%.

Results from the Living Environment Deprivation domain are summarised below, in Tables 24 to 26.

Income Deprivation Affecting Children

34% of children in Nottingham (just over 19,000) are affected by income deprivation. This is a slight fall on the 2010 indices which suggested 39% of children were affected.

2 City SOAs are within the worst 100 nationally for Income Deprivation affecting Children, the worst being in St Ann's ward, which ranks 9th in the country.

Results from the Income Deprivation Affecting Children index are summarised overleaf, in Tables 27 to 29.

City wards with all LSOAs in the worst 10% nationally	Aspley
City wards with all LSOAs in the worst 20% nationally	-

Source for Tables 27-29: Department for Communities and Local Government, 2015

All of the LSOAs in Aspley ward rank within the most deprived 10% nationally. Aspley has the highest proportion of children affected by income deprivation (51%), and also the highest number of children affected (2,900), because of its age-profile.
Bulwell and Bilborough wards also have more than 1,500 children affected by income deprivation.

Income Deprivation Affecting Older People

A quarter of older people (12,500) are affected by Income Deprivation in Nottingham.

Results from the Income Deprivation Affecting Older People index are summarised below, in Tables 30 to 32.

Table 30: The Extent of Income Deprivation Affecting Older People

City wards with all LSOAs in the worst 20% nationally	-

Source for Tables 30-32: Department for Communities and Local Government, 2007

Arboretum ward has the highest percentage of older people affected by income deprivation – at 57%, although Bilborough ward has the highest number affected (1,360 – equivalent to 35%)

Ward Results

DCLG did not produce IMD scores or ranks for wards. These have been estimated as described below.
Although in Nottingham, LSOAs fit neatly into wards, in other places in England, boundary changes mean that LSOAs do not always fit into wards, as they did at the time of the 2001 Census.
In order to estimate an Index of Multiple Deprivation for wards, we have used the following process:

- All English LSOAs have been 'assigned' to the ward in which contains their population weighted centroid using GIS;
- Every ward has had an IMD 'score' estimated from the average of its' population weighted LSOA scores;
- All ward scores have been ranked, and deciles calculated.

Unofficial estimated average ward scores for the City, along with the number of their LSOAs that rank amongst the 10% most deprived in the country, and an unofficial national decile, are given in Table 33, below.

As in the 2007 and 2010 Indices, Aspley is the most deprived ward, using this measure, followed by Bulwell. The least deprived wards are Wollaton East and Lenton Abbey and Wollaton West – as was the case in 2007 and 2010.

Five City wards have no LSOAs ranked in the 10% most deprived in England, a fall of 1 since 2010. These are Wollaton West (20th out of 20 City wards), Wollaton East and Lenton Abbey (19th), Dunkirk and Lenton (18th), Leen Valley (14th), and Sherwood (13th). This is not to say these wards do not contain people experiencing deprivation. The large student populations in both Wollaton East and Lenton Abbey and in Dunkirk and Lenton will have contributed to their better rankings.

Table 33: Average Weighted Scores for City wards, 2015

Ward name	Unofficial IMD average weighted score	National Rank (out of 7,680)	National Decile	City Rank (out of 20)	Number of SOAs	Number of SOAs in worst 10% in country	*2010 Rank by average weighted score*	*2007 Rank by average weighted score*

APPENDIX B

RESULTS FROM THE INDICES OF DEPRIVATION 2015 FOR CITY LOWER SUPER OUTPUT AREAS

The following tables contain LSOA results for the Index of Multiple Deprivation, the seven Indices of Deprivation domains, and the two Income Deprivation sub-domains.

National Ranks are out of 32,844, where 1 is the most deprived LSOA and 32,844 is the least deprived in England.
City Ranks are out of 182, where 1 is the most deprived SOA and 182 is the least deprived in Nottingham City.

The Rank change columns show changes between 2010 and 2015 for the National rank and the City rank. A positive change indicates a rank has improved since 2010, a negative change indicates a rank has got worse (i.e. nearer to 1) since 2010.

Please note:
Following the 2011 Census a number of LSOAs in the City changed. Due to population changes, some old LSOAs were split into two so they did not exceed the maximum population threshold for a LSOA, and others were merged. The 2015 Indices of Deprivation use 2011 based LSOAs (182 in the City) and the 2010 Indices of Deprivation used 2001 based LSOAs (176 in the City). As such, comparisons between the two Indices cannot be made for all LSOAs, but can be made for the 162 City LSOAs which remained the same after 2011.

The 2010 City rank in the following tables is the rank out of the 176 (2001 based) LSOAs.

For results and maps for the whole of Nottinghamshire, please see www.nottinghaminsight.gov.uk

Sources: Department for Communities and Local Government, Indices of Deprivation 2015; Office for National Statistics 2012 Mid Year Estimates of Population; Nottingham City Council

Please note: DCLG did not publish results for wards, so these have been estimated by Nottingham City Council by taking an average of population weighted SOA scores for each ward. This allows wards to be ranked compared to their relative position.

The national decile shows the estimated position of each ward in relation to the National picture.

APPENDIX D

THE DOMAINS AND INDICATORS

Seven domains of deprivation are combined to produce the overall Index of Multiple Deprivation. Each domain is comprised of a number of indicators.

This Appendix provides numerator and denominator details for each of the 37 indicators included in the Indices of Deprivation 2015.

As far as is possible, each indicator has been based on data from the most recent time point available. Using the latest available data in this way means that there is not a single consistent time point for all indicators, however in practice most indicators in the Indices of Deprivation 2015 relate to the tax year 2012/13.

Income Deprivation Domain
This domain measures the proportion of the population in an area experiencing income deprivation. A count of income deprived individuals is calculated by summing the following indicators:

- Adults and children in Income Support families
- Adults and children in income-based Jobseeker's Allowance families
- Adults and children in income-based Employment and Support Allowance families
- Adults and children in Pension Credit (Guarantee) families
- Adults and children in Working Tax Credit and Child Tax Credit families not already counted, that is those who are not in receipt of Income Support, income-based Jobseeker's Allowance, income-based Employment and Support Allowance or Pension Credit (Guarantee) and whose equivalised income (excluding housing benefit) is below 60 per cent of the median before housing costs
- Asylum seekers in England in receipt of subsistence support, accommodation support, or both

In addition, a supplementary Income Deprivation Affecting Children Index and an Income Deprivation Affecting Older People Index are produced. These represent the proportion of children aged 0-15 living in income deprived households and the proportion of older people aged 60 and over living in income deprived households respectively.

Employment Deprivation Domain
This domain measures employment deprivation - involuntary exclusion of the working age population from the labour market. A count of employment deprived individuals is calculated by summing the following indicators:

- Claimants of Jobseeker's Allowance (both contribution-based and income-based), women aged 18-59 and men aged 18-64
- Claimants of Employment and Support Allowance (both contribution-based and income-based), women aged 18-59 and men aged 18-64
- Claimants of Incapacity Benefit, women aged 18-59 and men aged 18-64
- Claimants of Severe Disablement Allowance, women aged 18-59 and men aged 18-64
- Claimants of Carer's Allowance, women aged 18-59 and men aged 18-64

Health Deprivation and Disability Domain
This domain measures morbidity, disability and premature mortality and is comprised the following indicators:

- Years of potential life lost (Mortality data in five-year age-sex bands)
- Comparative illness and disability ratio (Disability Premium, Attendance Allowance, Disability Living Allowance, Severe Disablement Allowance, Incapacity Benefit.)
- Acute morbidity (Hospital spells starting with admission in an emergency)
- Mood and anxiety disorders

Education, Skills and Training Deprivation Domain

This domain measures the extent of deprivation in terms of education, skills and training in an area. There are two sub-domains: one relating to children and young people and one relating to adult skills. The following indicators are used to calculate this domain:

- Key Stage 2 attainment
- Secondary school absence
- Staying on in education post 16
- Entry to higher education
- Adult skills (Working-age adults with no or low qualifications)
- English language proficiency (Working-age adults who cannot speak English or cannot speak English well)

Barriers to Housing and Services Domain

This domain measures accessibility to housing and key local services. There are two sub-domains: 'geographical barriers', which relate to the physical proximity of local services, and 'wider barriers' which includes issues relating to access to housing such as affordability. The following indicators are combined to calculate this domain:

- Road distance to a post office
- Road distance to a primary school
- Road distance to general store or supermarket
- Road distance to a GP surgery
- Household
- Homelessness
- Housing affordability

Crime Domain

This domain measures the rate of recorded crime in an area for four major crime types representing the risk of personal and material victimisation at a local level.

- Violence
- Burglary
- Theft
- Criminal damage

Living Environment Deprivation Domain

This domain measures the quality of individuals' immediate surroundings. There are two sub-domains: the 'indoors' living environment, which measures the quality of housing, and the 'outdoors' living environment which contains two measures relating to air quality and road traffic accidents. The following indicators are combined to calculate this domain: ousing in poor condition

- Houses without central heating
- Air quality
- Road traffic accidents
