

Nottingham City Council Local Air Quality Management Annual Status Report 2017

Document published 03/07/2017

Description:

The Annual Status Report is an element of the Local Air Quality Management process Local Authorities are required to undertake under the Environment Act 1995 and subsequent Regulations. The ASR 2017 reports new monitoring data and identifies the need for Nottingham City Council to undertake a `Detailed Assessment' to assess air pollution from a range of transport sources that emit nitrogen oxide and dioxide, and the need to vary the extent of the two existing Air Quality Management Areas (declared for nitrogen dioxide).
