JSNA Progress Update

Air Quality 2015			
Recommendation	Lead/s	Progress on implementing recommendations (June 2020) – outline key successes & any challenges	Additional Information
Review and update the Nottinghamshire Air Quality Strategy	Nottinghamshire Environmental Protection Working Group	Completed – taken to Health & Wellbeing Board 2019. Approved and now ready for publishing	
Evaluate the impact of the existing Nottinghamshire Air Quality Strategy	Nottinghamshire Environmental Protection Working Group	See above	
Consider whether air quality should be included as a priority within the Health and Wellbeing Strategies of Nottingham City and Nottinghamshire County Councils, given the new evidence of health impacts and the overlaps with key public health agendas.	Health and Wellbeing Boards	Air Quality not explicitly included in the Priorities and Outcomes of the 2018 Health & Wellbeing Strategy Update but recommended for addition in 2019. Covered by the Healthy and Sustainable Place Group. Nottingham City have it as a priority in their Health & Wellbeing Strategy and the Council has its own detailed air quality plan for the city.	
Conduct further evidence review in order to prioritise actions on the basis of cost-effectiveness and likely impact	Public Health	Public Health England have published a review which can be used locally.	
Consider incorporation of revised air quality aspirations into the Local Development Plans	Planning & Environmental Health	Air Quality forms part of the Spatial planning & Health Framework and Health Impact Checklist produced and used for Local Development Plans.	

Identify further opportunities, through policy, strategy and interventions, to improve the take up of active travel, low emission vehicles and public transport across Nottinghamshire County and Nottingham City.	Environmental Health, Transport & Planning	Active and Sustainable Travel is a strategic objective in the Air Quality Strategy.	
Identify opportunities for councils to lead by example in their sustainability policy, vehicle fleet management and use of local powers to improve air quality.	Nottinghamshire Environmental Protection Working Group	There is the need and opportunity for Councils to incorporate such actions in their Environmental (Carbon Reduction) Plans. This is currently being written.	
Incorporate information and action on air quality into NHS sustainable development management plans.	Clinical Commissioning Groups	There is a national NHS target to reduce emissions. The ICS Prevention Plan has Air Quality as a local priority	Further work required to follow-up CCG actions
Engage with the newly formed East Midlands Air Quality Network	Environmental Health, Public Health	This link has now been established	
Develop a communication strategy to provide key messages on air pollution to the public.	Public Health.	Clean Air Day 2019 promoted through Primary Care using materials developed by Public Health. 2020 – national campaign on hold as a result of Covid-19
