WARD REPORT 2023

INTRODUCTION

This report includes a number of statistical indicators for the Wards and Area Committees of Nottingham. It includes contextual data on Demographics – including age, sex, ethnicity and deprivation, plus data for a number of indicators, covering the themes of Worklessness; Education; Health; Crime and Liveability. The report also includes data at Area Committee level from the 2022 Citizen's Survey.

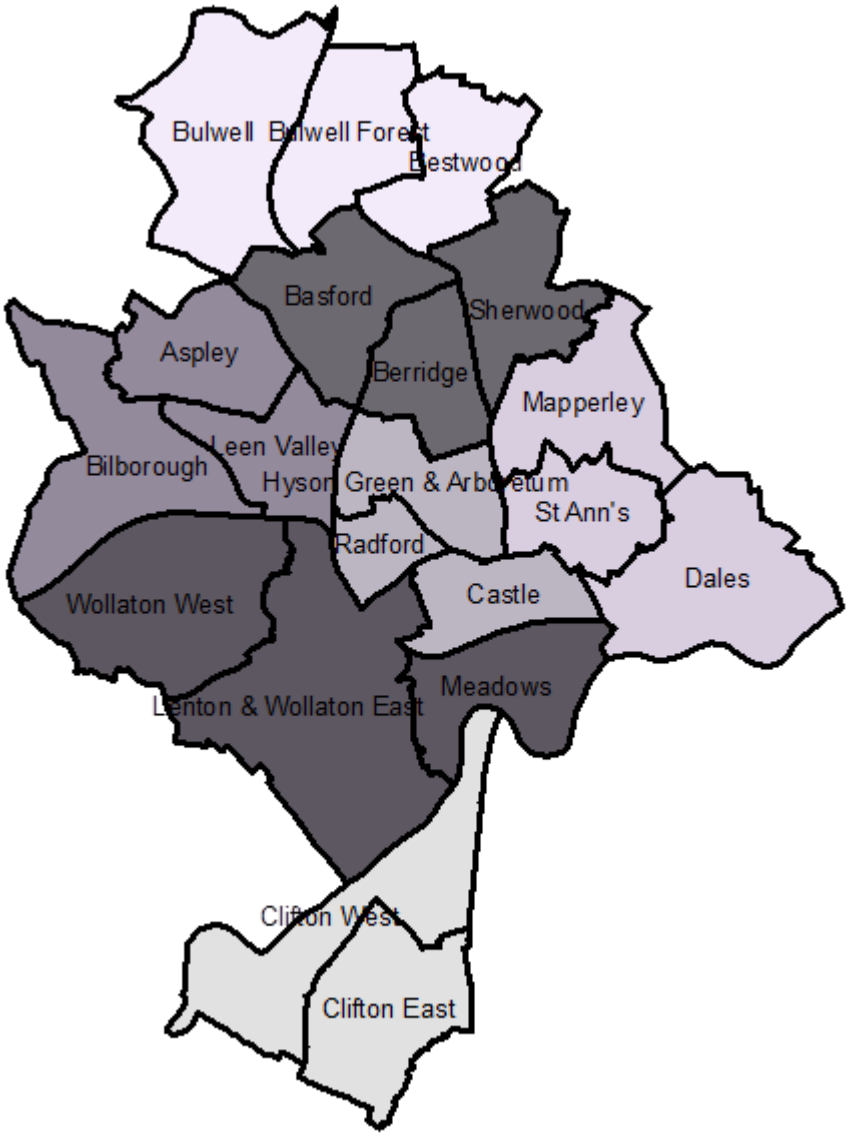

Data have been obtained from a number of Agencies, Partners and colleagues within the City Council, including: Department for Work and Pensions; Public Health and Nottinghamshire Police. The contextual tables include data from the Office for National Statistics and the Department for Communities and Local Government, and much is subject to Crown Copyright. Please quote the source when using the data.

Other data and analysis are available on the Nottingham Insight website (www.nottinghaminsight.org.uk), which also includes further contextual data from the 2021 Census, the 2019 Indices of Deprivation, plus Ward Reports from the past few years.

If you would like any further information about this report, please contact Nicola Kirk in the Policy and Research team in the City Council, on (0115) 876 3979, or by e-mail, at: nicola.kirk@nottinghamcity.gov.uk

The table and map below show which of the new City wards make up each Area Committee.

Claimant Count Rate, Jul 2023

- 2.0 - 3.1
- 3.2 - 5.3
- 5.4 - 6.6
- 6.7 - 8.4

- Please note: The Claimant Count measure of unemployment is simple count of those who claim benefits related to unemployment.
- Unemployment increased by 815 across the City between July 2022 and July 2023, with 17 wards seeing increases.
- The largest increase was in Bilborough and in Hyson Green & Arboretum wards ward – with 85 more claimants.
- Bulwell ward has the highest unemployment rate at 8.4%, and Lenton & Wollaton East ward has the lowest, with 2.0% of the population aged 16-64 claiming - although rates in this ward are slightly skewed due to the large numbers of students.

Premature cancer mortality, DSR

- 105.9 - 127.6
- 127.7 - 151.8
- 151.9 - 185.8
- 185.9 - 222.5

- **Definition:** Rates are Directly Standardised to the European Standard Population to allow for the differing age and sex structures in each area. In 2013, the European Standard Population which had been in use since 1975 was updated and thus rates published here are not comparable with those published previously.
- The rates are based on three years of pooled data and are per 100,000 population.
- **Caveats:** Please note the upper confidence limit (UCL) and lower confidence limit (LCL) figures in the table and indicated on the chart above by the error bars. These overlap for many of the wards meaning they are not significantly different to one another.
- The highest rate of premature deaths from Cancer is in St Ann's ward, at 223 per 100,000 population. The lowest rate is in Wollaton West, at 106 per 100,000.
- Due to the large confidence limits, many differences between wards are not statistically significant, but Wollaton West has a significantly lower rate than 3 other wards.

- **Please note:** the y-axis on the graphs opposite do not start at 0. Please also note that the range on the maps has been manually amended to show the same categories.
- **Please note:** Some wards may have a higher rate than others but not be significantly different due to the large confidence intervals.
- For males, the highest life expectancy at birth is in Wollaton West ward at 81.0.
- For females the highest life expectancy at birth is in Castle ward, at 99 – although this is based on low numbers with very a high confidence interval. The next highest life expectancy for females is in Wollaton West at 85.7.
- The lowest life expectancy at birth for males is in Meadows ward at 72.0, and for females is in Bilborough ward at 77.3 years.
- For males, the gap in life expectancy at birth between the highest and lowest is 9.0 years. For females this is 22.4 years including Castle ward, or 8.4 excluding the unusually high Castle ward.

Caveats: Ward level rates must not be published on the internet, so the table above, and the graph and map below, just state whether a ward's rate is significantly different to the City average.

Please note: Some wards may have a higher rate than others but not be significantly different due to the large confidence intervals.

Teenage Conceptions 2018-2020

- Not statistically different
- Significantly higher than city average
- Significantly lower than city average

- Two City wards have a Teenage Conception rate that is significantly higher than the average for Nottingham.
- Five wards have a teenage conception rate that is significantly lower than the City average.
- Although the data is not directly comparable, in 2021 Nottingham had an under-18 conception rate of 19.2 per 1,000 females (in that age group). This was a fall from a rate of 19.3 per 1,000 in 2020 and continued the fall in recent years.
- The corresponding rates for England as a whole were 13.2 per 1,000 in 2021 and 13.1 per 1,000 in 2020.

- **Definition**: Violent crime covers a number of offences where physical or verbal assault has taken place on an individual (this includes threats of violence). Offence types range from harassment, to assault, to grievous bodily harm and murder, but the number of serious offences tend to be relatively small. Sexual Offences are also included in this category. Violent crime includes Domestic Violence, which is defined by the Home Office as any violence between current and former partners in an intimate relationship, wherever the violence occurs.
- **Please note:** The figures are based on location of the crime, not residence of the offender or victim.
- The highest rate of violent crime is in Castle ward, at 242 incidents per 1,000 population. Note that Castle ward contains much of the City Centre area.
- The lowest rate is in Wollaton West, at 12.5 per 1,000 population.
- 10 wards saw an increase in incidents between 2021 and 2022, with the largest seen in Castle ward – with 496 more incidents.

Indices of Deprivation 2019: (Ministry of Housing, Communities and Local Government) The Indices of Deprivation measure the different types of deprivation experienced by individuals living in an area. Scores and Ranks are published for Super Output Areas but not for wards. The ward ranks above have been estimated by taking an average of the population weighted SOA scores for each City ward. These are unofficial. The City Ranks are out of 20. The SOA column gives the number in the worst 10% of SOAs in England and the total SOAs in the area.

Students: Source: 2021 Census. Economic activity - full time students who are either economically active in employment or unemployed, or economically active. . These figures are not comparable with figures from the 2011 Census previously published in ward reports.

Households: Source: 2021 Census

Student households: are from November 2022 Council Tax exemption records with adjustments made to include an estimate of student "households" in purpose built student properties.

A household is defined as "a person living alone or people living at same address sharing a living or sitting room or sharing at least one meal per day". Because this relates to people, rather than buildings, vacant dwellings will not be included. The intention is that households in purpose-built student dwellings are excluded, but some may be included.
